

EASYCare

Hardscape Cleaner

Rejuvenate and protect stone surfaces

5 litre ready-to-use bottle

A high performance non-solvent, non-acid cleaner, which removes natural soiling from all porous building materials. This is a strong cleaning product which attacks dirt and grime but will not damage natural/sensitive stone.

Results can be seen quickly with improvements continuing for 24 hours.

Features & Benefits

- Excellent rejuvenator for heavily-soiled paving, walls, floors, paths, fountains, monuments, block paving and all other natural stone and concrete
- Can also be used to clean decking, fences and other timber structures

APPLICATION

- SHAKE THE CONTAINER FOR 30 SECONDS BEFORE EACH USE
- USE NEAT AS SUPPLIED
- Always test a small area before use to ensure compatibility and that the finished result is acceptable
- Apply directly to the surface to be treated and spread with a broom. Saturate the surface with a generous even coat at the following rates: Heavy soiling and contamination - 3m² per litre. Light soiling and contamination at 5m² per litre
- Leave for 2 - 8 hours depending on the level of contamination. The heavier the contamination the longer it should be left before rinsing. To determine the time required, try a few test areas before completing the whole project
- Rinse with (light) pressure washer, ensuring all traces are removed*
*This product may cause jointing compounds to soften, care is to be taken when rinsing. This is only temporary and joints will return to normal once allowed to dry fully
- The longer the product is left to work (up to 24 hours) the brighter the surface will appear

Note: The more porous the surface the less the coverage will be

Precautions

- **Always test on a small hidden portion of the surface to be cleaned to check compatibility and performance before commencing on the whole area**
- Surface should be clean. Remove loose dirt, moss and other debris from the surface to be treated. A yard broom or firm bristle brush is ideal
- Ideal ambient and surface operating temperature is between 10°C to 20°C. As a guide, ensure the surface is cool to the touch
- Do not use in frost or when surface and air temperature is below 5°C. If used in cooler temperatures effectiveness may be reduced and longer cleaning time may be required
- Do not use in wet weather or if rain is forecast within the application period (see above)
- Keep children and pets away until surface is fully dry
- Clean tools and other equipment with warm soapy water immediately after use

Storage

- Store between 5°C and 25°C
- Store in a cool, well ventilated area
- Keep out of direct sunlight and protect from frost in original container
- Keep out of reach of children

Health & Safety

- Contact with acids liberates toxic gas
- Causes severe skin burns and eye damage
- Very toxic to aquatic life
- Do not breathe fumes/gas/mist/vapours/spray
- Wash hands thoroughly after using
- Avoid release to the environment
- Do not get in eyes, on skin or on clothing
- Wear protective gloves/protective clothing/eye protection/face protection
- Product contains strong oxidising agents - do not get on clothes or fabrics as damage will occur
- **IF ON SKIN:** Gently wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. If skin irritation or rash occurs seek medical advice/attention
- **IF IN EYES:** Bathe the eye with running water for 15 minutes. Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes and get medical attention. Remove contact lenses if possible and safe to do so
- **IF SWALLOWED:** Rinse mouth. Do NOT induce vomiting. Wash out mouth with water. If conscious, give half a litre of water to drink immediately. Transfer to hospital as soon as possible
- **IF INHALED:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If feeling unwell, call for medical assistance

Contains:
BENZALKONIUM CHLORIDE
2-PHENYLPHENOL
SODIUM HYPOCHLORITE
