Square Tiles

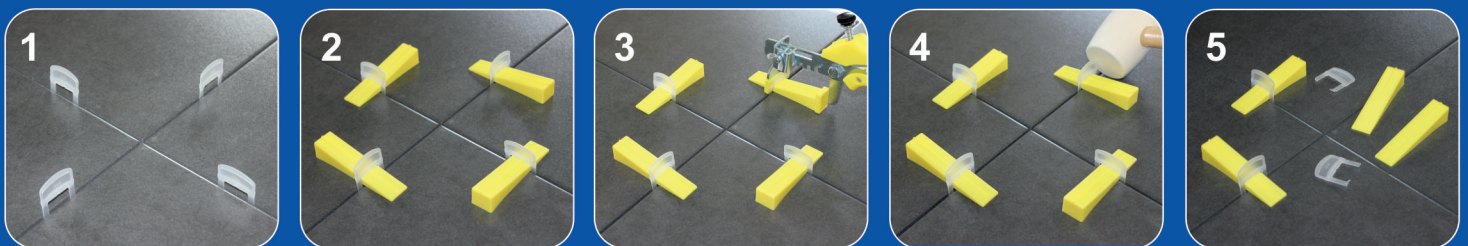

Rectangle Tiles

TILE RITE LEVELLING SPACER SYSTEM

A unique 2 piece installation system designed for fitting large format Porcelain, Marble & Stone tiles requiring even grout joints and no lippage.

NOTE: Not designed to solve uneven floor problems, uneven surfaces must be levelled prior to laying tiles.

INSTRUCTIONS FOR USE

1. Apply tile adhesive according to manufacturers instructions. Slide two levelling spacers approximately 100mm from each end of the tile. Place the next tile.
2. Slide a reusable wedge into each clip. Tighten until the tiles are snug against the bottom of the wedge.
3. Special pliers are available to easily drive wedges into levelling spacers. Adjust the tile so that the sides are aligned and the tiles are pushed tightly against the levelling spacer.
4. Let adhesive dry as required by manufacturers instructions. To remove the wedges kick the side of the levelling spacer to snap them off or Use a non marking rubber mallet to snap the spacers.
5. Grout to finish tiled area & keep the wedges for future use.
